

QUICK START DB120

(rev 20230418)

Attach to the drone

Attach the db120 on the top of your drone:

- Use the 3M dual lock™ stickers (included).
- And/or use two M5 screws.

Use the db120

- Power on the db120.
- Wait for Status LEDs to signal *Ready for take-off*.
- You are ready to fly.

Status LEDs

Ready for take-off: slowly flashing (every 4s), location acq.

Non-compliant config: very slow flashing (every 20s), location acq.

Acquiring location

Charging

Charge the db120 using a USB-C charger. Charging LED turns green if fully charged.

Configuration

No configuration is required for USA. Configure operator ID for EU use.

Press configuration button and connect to *dronebeacon* WLAN network. Point your browser to <http://192.168.50.1>
